

Carbon Black Approval Program – Corporate

Overview

A corporate client wanted to improve the efficiency of their carbon black approval program.

Objectives

Review the current approval system and make recommendations for process and characterisation methodologies.

Actions

- Understand current approval system
 - Process
 - Characterisation techniques
- Determine areas for improvement
- Report on areas of improvement

Outcome

MRT identified potential weaknesses in the approval system.

The client was able to implement recommended changes resulting in a more robust process with a higher level of discrimination as well as improved approval times.
