

Tire Silane Market and Development Review

Overview

A leading supplier and innovator in the field of sustainable value added chemicals wanted to understand the tire silane market and future development potential.

Objectives

Provide concise market volume and values for tire silanes for 2015 through 2020 for designated regions. Provide a commentary regarding current and future tire silane technology developments and their role in sustainable product development. Utilise industry contacts to develop leads as necessary.

Actions

- Project scope was agreed following detailed discussions.
- A formal report was prepared and submitted.
- Industry contacts were primed for further project advancement.

Outcome

A detailed report was prepared and submitted prior to the deadline.

The report covered past, present and future market volumes and technological aspects as well as feedback from key contacts within the industry.

Final clarifications were made on a project wrap up call.
